Session 001
1500-1532

Site involves a group of structures that involve rounded, curving, domed, thick, solid, and linear components, some of which at least seem old, very solid, spacious inside, and somewhat picturesque. One structure at least is significantly domed, curving, voluminous, and hollow inside. Surrounding area is hilly, humid, vegetated, and is presently dripping, as if it just had rained. The surface of the ground is regularly bumpy, A/S of cobblestones. There is a sense of a meeting to be held here soon. People are to gather that are leaders, to some degree opponents of each other, who have a deal to work out and things to compromise about to get what they each want. There seems to be some sense that some of these individuals at least are religiously affiliated. The location is more tropical, or at least typically warmer than most of the US. It seems like a non-US, quasi-Europeanized 3d world nation. AOL/S of Pope and the Vatican.
